

Elon Musk – Dream Big, Work Hard

Elon Musk was born in South Africa in 1971. As a child, he spent hours reading books about science and adventure. His love of reading helped him imagine inventions and dream about the future.

At age 17, Elon moved to Canada, and later to the United States to study economics and physics at the University of Pennsylvania. He was a smart and ambitious student. After starting a PhD program at Stanford University, he decided to leave school early to focus on building real companies that could change the world.

Elon's first company was X.com, an online payment service. It later became known as PayPal, which made sending money online easier and faster. After selling PayPal, Elon used his success to start new projects that could help both people and the planet.

He founded Tesla, which builds electric cars and solar energy systems to reduce pollution. He also created SpaceX, a rocket company that aims to make space travel cheaper and safer. Elon believes that one day humans will live on Mars, and SpaceX is working to make that dream possible.

Elon didn't stop there. He started Neuralink, a company that connects computers to the human brain, and The Boring Company, which digs tunnels for faster travel. In 2022, he bought Twitter and renamed it X, turning it into a new kind of social media platform.

Today, Elon Musk is one of the richest and most influential people in the world. His bold ideas and hard work continue to inspire millions. In 2021, Time magazine named him Person of the Year, recognizing his impact on technology, energy, and the future of humanity.

Elon Musk – Questions

What We Can Learn

- Stay curious — learning opens new doors.
- Believe in big dreams and chase them boldly.
- Work hard and never stop improving.
- Inspire others to dream and build too.

Questions
