

## Mark Zuckerberg – Social Media Pioneer

**Mark Zuckerberg** was born in White Plains, New York, in 1984. He grew up in a loving and educated family. His father was a dentist, and his mother was a doctor. Mark liked computers from a young age and enjoyed creating small games and programs.

When he was a teenager, Mark learned to code and loved solving problems on the computer. He went to Harvard University, where he studied computer science. While in college, Mark and his friends created a website to help students connect and share with one another. That small idea soon grew into something much bigger — a website called Facebook.

Facebook became one of the most popular social media sites in the world, helping billions of people connect online. Mark became one of the youngest billionaires in history, and one of the richest people in the world. But success also brought challenges. Some people worried about privacy, online safety, and how social media affects society. Mark's company faced many questions and criticisms, making his life and decisions sometimes controversial.

Even with all the pressure, Mark kept working to make his company better. He also started a new company called Meta, which became one of the biggest technology companies in the world. Meta builds new tools and virtual worlds where people can meet, learn, and play.

From a small college project to one of the biggest companies in the world, Mark helped billions of people connect and share online, changing how people communicate everywhere. He also became one of the most influential people in the world, inspiring others to dream big and use technology to make a difference.
