Sergey Brin: Google's Explorer

Sergey Brin is one of the brilliant inventors who helped make the internet easier to use. He is best known as the co-founder of Google, along with his friend Larry Page. Sergey was born in 1973 in Moscow, Russia. When he was six years old, his family moved to the United States so they could have more freedom and better opportunities.

From a young age, Sergey loved numbers, puzzles, and computers. His father was a math professor, and his mother was a scientist at NASA. They encouraged him to ask questions and explore how things worked. Sergey studied computer science and mathematics at the University of Maryland and later went to Stanford University for graduate school.

At Stanford, Sergey met Larry Page. They quickly discovered that they shared a passion for organizing information and making it useful. Together, they worked on a project that could rank web pages by importance — this became the start of Google.

In 1998, Sergey and Larry launched Google from a small garage in California. Their search engine became famous for finding answers quickly and accurately. Google grew into one of the most successful companies in the world and changed how people use the internet every day.

Sergey Brin didn't stop there. He also worked on projects like Google Glass and self-driving cars. He believes that technology can make life better and help solve big problems. Sergey is known for his curiosity, creativity, and desire to explore new ideas — qualities that inspire kids everywhere to think big and never stop learning.

Sergey Brin – Questions

What We Can Learn

- Be curious and explore new ideas.
- Work with others to reach big goals.
- Use technology to help people.
- Keep learning and stay creative.

Questions

1. What is Sergey Brin best known for creating?
   a) Microsoft
   b) Facebook
   c) Google
   d) YouTube

2. Who did Sergey Brin work with to start Google?
   a) Steve Jobs
   b) Bill Gates
   c) Larry Page
   d) Jeff Bezos

3. Where did Sergey and Larry first start Google?
   a) In a big office building
   b) In a small garage
   c) In a classroom
   d) In a basement

4. What subjects did Sergey Brin study in school?
   a) Art and design
   b) Computer science and mathematics
   c) History and language
   d) Music and literature

5. What important lesson does Sergey Brin's story teach?
   a) Success happens by luck
   b) Technology is only for adults
   c) Curiosity and teamwork can change the world
   d) Learning stops after school

1. C 2. C 3. B 4. B 5. C
