

Earth Wonders - Ross Ice Shelf, Antarctica

In the icy world of Antarctica, there's an amazing place called the Ross Ice Shelf. It's like a gigantic, frozen platform that floats over the sea. This icy wonder is super important for understanding our planet, and it's a bit like a frosty puzzle piece at the bottom of the Earth. Scientists study it to learn about Earth's history, and it's also a place where penguins and seals play in the chilly waters!
